

CUPW statement on mandatory vaccination for federal sector employees

CUPW continues to encourage all of our members, of which the majority are postal workers, to get vaccinated to protect themselves, their coworkers, their families and their communities.

Maintaining the health and safety of our members and the public is our number one priority.

In light of the federal government announcement on mandatory vaccination, we urge the government to provide the full details of application.

We also expect the government to meaningfully consult with unions before making any decisions that could significantly impact our members.

CUPW will also engage with Canada Post to continue to protect the health, safety, and rights of our members in continuing to provide important services to the public.
