

Denying your identity shouldn't be
a requirement to save someone's life

ALL
BLOOD IS
EQUAL

Health Canada has authorized Canadian Blood Services to change its approach to blood and plasma donor screening. This ends a decades-long discriminatory ban which has targeted Two-Spirit, gay, bisexual, and queer men, trans women, and other men who have sex with men (2SGBTQ+/MSM).

It's not enough. It's still discriminatory. We must do more.

The same regulatory change must be adopted by Hema Quebec and there are still restrictions for individuals who take PrEP and PEP as well a ban based on sexual behaviours that Health Canada deems "risky."
